力普水片®

Metal-TAB *Metal Cutting Fluid Long-lasting Antibacterial Anti-corrosive Tablets*

Introduction to the product

Metal TAB antimicrobial sustained release tablets are solid tablets with DBNPA as the main ingredient. Based on the long-lasting controlled release technology (CRT), the product can slowly release the active bactericidal substance under the conditions of use to achieve fast, continuous and efficient microbial control, which can maximize the service life of metalworking fluids and simplify the microbial treatment process of metalworking fluids.

Technical indexes

Item	Index
Appearance	White tablet
Specification	100g/tablet
Content of active ingredient	95%

Product features

- Leading-edge controlled release technology to ensure continuous and reliable sterilization;
- Easy to use, and there is no need for system modification and complex dosing equipment;
- Simple management with each tablet lasting for two to three weeks, effectively reducing the operating and management cost;
- With excellent chemical compatibility, widely applicable to various water-based metal cutting fluids;
- Wide adaptability to PH range, and the working fluids can operate in acidic, neutral and alkaline conditions;
- Each tablet is packed with a single piece of water soluble film, free of dust, splash and leakage, ensuring safety;

Method of use

Each piece (100g) of metal tablet can process 200L of metal cutting fluid. Choose the corresponding pieces of “tablets” according to the actual volume of metal cutting fluid, put them in mesh bags and hang them at an appropriate position in the system. It is usually effective for two to three weeks, and it can be renewed after complete dissolution.

Note : Please consult Leap Industry service engineers for its application in other fields.

Packaging and storage

Each set of 10 tablets is packed in a Paper Tube, Every 90 tablets (9.0kg) is sealed in a recyclable carton.

It shall not be exposed to sunlight or rain during transportation. It shall be stored in a ventilated and dry place below 40℃. It shall be protected from freezing, heating or direct sunlight. It has a shelf life of twelve months under the required storage conditions.
